

We are on a sustainable journey!

By **2050** our oceans could contain more plastic than fish, so we're minimising our plastic use at Pacvac.

Recycled cardboard saves **80%** water & **25%** energy

*Can be recycled up to **5-7 times**
*Takes only **3 months** to break down

How are we helping

In the past...

-  Substantial polystyrene and plastic waste
-  Multicolour print with extensive use of ink
-  Bleached cardboard box with glossy coating
-  Easy to miss recycling symbol

Future-focused practices

-  Less single-use plastic and polystyrene
-  Monochromatic print with less ink
-  Raw brown cardboard with no toxic coating
-  Clear recycling message and symbol

Playing our role in sustainability

Ease the cardboard recycling process

Reduce cardboard contamination rate

More eco-friendly supply chain

Promote higher levels of sustainability

Our work here is far from done, but we are committed to sustaining our planet through ethical sourcing and waste reduction wherever possible. We hope you join us on this mission.
